

The Complete Online Solutions

Web, Social Media integration, Search Engine Optimization, Brand Building,
Online campaigns / Marketing, Emailing & Collaborative Solutions to ensure
360 Degree Online Coverage

Why Choose SIPSS-GLOBAL- Why Are We Different

- * we create your web solution with a creative flair and technical competence that is unique. Most web designers are excellent at design but they have little comprehension and interest in SEO and the knowledge to code your site in a 'Google friendly' structure. Neither do they have the technical knowledge to build back-end systems. White Hat have both all under one roof, to offer you a combination of essential services to ensure your website not only looks good, it is cleanly coded with the features you require and will validate to www.w3.org standards. All projects are project managed with timelines with scope to allow for change throughout the process and within agreed budgets.
- * From the initial meeting, we discuss your project requirements and outline in plain English your responsibilities, as well as explain what we will do and what we need to make your web project a reality. SIPSS-GLOBAL aims to deliver a website that embodies your aspirations in a professionally designed format that is both easy to navigate and Google friendly.
- * Our extensive experience in building commercial live websites has given us the essential experience to ensure your web business works for you. We will advise and guide you, and tell you what you require plus what you will need to sell your product or service or deliver your message to your intended target audience.

We don't make only websites - we make effective ones

- * If you are looking for just a website then SIPSS-GLOBAL is not the company to partner with, as we do not offer template designs and re-badge. What we do offer is a truly bespoke service by creating your web site from scratch. This ensures build quality with clean code architecture that validates to W3 standards
- * If you want a quality online Content Management System that is Google/ Search engines Friendly speak to us because we're worth it.

SOCIAL MEDIA SPECIALISTS

From fully branded facebook pages to twitter pages, we can help you with your social media prescence

It is becoming so important now than ever to become part of the social media and Complete Online Solutions are here to help and guide you with all aspects of social media networking.

Sorry !!!! this is not an optional tool this is a part our Solution Suit

Small & Comprehensive Business

- * We have no limitation on Web pages unlike others 5 – Page one charge, additions are charged extra etc
- * We never do a one time business- It will be continues engagement in the form of a proper MOU and convenient payment milestones to ensure the proper maintenance and change during the life cycle of the online content
- * We never do just a website, It will in the form of complete collaboration suit which is ready to leap your organization ahead with the right online platform

Search Engine Optimization

- * Most SEO companies that call you are sales top heavy and persuasive and claim to guarantee results with such self assuredness that the clients part with money and sign long contracts that effectively **'tie you in' with an upfront payment and a monthly on-going payment.**
- * They often over promise and under deliver and once you have signed a contract you're hooked. If they fail to deliver after 6 months you have paid out a lot of money and still nowhere to be seen on Google or not in the top 20.
- * Firstly, no one will call you from Google to offer SEO services it just doesn't happen if they claim they are then say goodbye. They could be selling PPC Ad words to get you listed on sponsored listings on the first page but don't be confused as this is not SEO.
- * If it was that easy then every site would be successful. In truth it's normally much harder and in some cases it's simply not going to be possible to secure top ten ranking on Google.
- * We prefer to do things differently at SIPSS-GLOBAL and we are prepared to put our money where our mouth is and offer a free SEO MOT to run some diagnostics on your website to see if the site is 'Google friendly' Before you can take your car round a race track to compete you need to make sure its fit for the track and highly tuned.
